

SFA Design Group, LLC - Portland, Seattle, and Livermore Offices (Consulting Structural Engineers) is looking to fill 1 position. In order to be considered, candidates must have an engineering degree with structural emphasis and have passed the EIT. PE and/or SE a plus. Experience in the design and analysis of residential, commercial, retail, multifamily, and industrial buildings a plus. Candidates will be evaluated/selected based upon their design experience with timber, concrete, masonry, steel, foundations, computer analysis programs, and communication skills. An emphasis on wood design a plus. Competitive salary and benefits.

Our staff is comprised of highly competent engineers dedicated to the successful completion of all projects worked on. Office culture prioritizes hitting deadlines and enjoying a social work environment. Successful candidates will have the opportunity to work on a wide variety of projects ranging from light residential to multi-story structures utilizing all materials. Our work ranges across the United States as well as Canada.

If you possess the skills described above and enjoy working on a wide variety of projects with an exceptional group of engineers and clients, submit your resume for consideration.
